Pediatricians have an important role not only in early recognition and evaluation of autism spectrum disorders but also in chronic management of these disorders. The primary goals of treatment are to maximize the child's ultimate functional independence and quality of life by minimizing the core autism spectrum disorder features, facilitating development and learning, promoting socialization ...

Deep learning (also known as deep structured learning or hierarchical learning) is part of a broader family of machine learning methods based on learning data representations, as opposed to task-specific algorithms. Learning can be supervised, semi-supervised or unsupervised.. Deep learning architectures such as deep neural networks, deep belief networks and recurrent neural networks have been ...

Neuro-linguistic programming (NLP) is an approach to communication, personal development, and psychotherapy created by Richard Bandler and John Grinder in California, United States in the 1970s. NLP's creators claim there is a connection between neurological processes (neuro-), language (linguistic) and behavioral patterns learned through experience (programming), and that these can be changed ...

Introduction. By using directed gene transfer to treat human disease, gene therapy may hold the potential to revolutionize medicine – in part because this approach is capable of treating the root cause of a disease, not merely its symptoms. 1 Despite numerous setbacks in the past decades, gene therapy remains as a field that is constantly growing and developing as scientists look for new ...

Cramer Fish Sciences is built around a core group of senior scientists with distinguished careers in fish, aquatic ecology, genetics, biostatistics, and population modeling, mixed with upcoming scientists that have outstanding scholastic achievement and fresh training in leading-edge methods and technologies.Support, field research, and population monitoring is provided by teams of well ...

WHO WE ARE – Cramer Fish Sciences

Heather, I agree completely with what you say in your article. I have to say though, that what worries me even more are the situations in which parents load their children up with so many extra curricular activities, that all the time that would normally be free time is so structured and goal oriented that in the end the child is not able to play in an unstructured environment and ultimately ...
