Sentaurus Structure Editor is a 2D and 3D device structure editor, and a 3D process emulator based on CAD technology. The three distinct operational modes share a common data representation. Geometric and process emulation operations can be mixed freely, adding more flexibility to the generation of 3D structures.

### **Sentaurus Structure Editor - Synopsys**

flow. Process emulation is used for first order device analysis (e.g. targeting a device for new specs., exploring new device concepts). Process simulations can be done once a new device architecture has been optimized by means of device simulation in order to (a) investigate process non-idealities, (b) target process specs. Compact Modeling.

Note that Sentaurus Workbench automatically preprocesses a project when you click the Run button. Therefore, manual preprocessing is not necessary most of the time. 4.2 Setting Up Multiple Experiments. To set up multiple experiments: Experiments > Add New Experiment. Enter the values as shown in Figure 4. Figure 4. Add New Experiment dialog box.
