

separation of compounds by pdf

Lab #2 PHYSICAL SEPARATION TECHNIQUES Introduction When two or more substances, that do not react chemically, are blended together, the result is a mixture in which each component retains its individual identity and

Lab #2 PHYSICAL SEPARATION TECHNIQUES Introduction

In organic chemistry, phenols, sometimes called phenolics, are a class of chemical compounds consisting of a hydroxyl group (-OH) bonded directly to an aromatic hydrocarbon group. The simplest of the class is phenol, $\text{C}_6\text{H}_5\text{OH}$. Phenolic compounds are classified as simple phenols or polyphenols based on the number of phenol units in the molecule.

Phenols - Wikipedia

Capillary electrophoresis (CE) is a family of electrokinetic separation methods performed in submillimeter diameter capillaries and in micro- and nanofluidic channels. Very often, CE refers to capillary zone electrophoresis (CZE), but other electrophoretic techniques including capillary gel electrophoresis (CGE), capillary isoelectric focusing (CIEF), capillary isotachopheresis and micellar ...

Development of single-enantiomer drugs was also made possible by asymmetric synthesis and chiral separation techniques. Several guidelines dealing with chiral drugs (FDA's, 1992, Health Canada, 2000, European medicines agency, 1996) have been published which encouraged the development of single enantiomer drugs for pharmaceutical manufacturers.. The quality of chiral drugs was stipulated by ...
