In mathematics, a sequence is an enumerated collection of objects in which repetitions are allowed. Like a set, it contains members (also called elements, or terms). The number of elements (possibly infinite) is called the length of the sequence. Unlike a set, the same elements can appear multiple times at different positions in a sequence, and order matters.

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.

READING AND WRITING TOGETHER. Writing is not a skill that students learn separate from other processes. It combines many complex activities, including categorizing, building key terms and concepts for a subject, measuring one's reaction to a subject, making new connections, abstracting, figuring out significance, and developing arguments to name a few.
